Institute of Electrical Engineers
33 West 39th Street, New York, N.Y.

AIEE 1939 REFERENCE INDEXES

This pamphlet contains complete multientry reference indexes covering the entire content of both ELECTRICAL ENGINEERING and TRANSACTIONS for 1939.

ELECTRICAL ENGINEERING

(Pages 3–10)

General articles, news, and biographical items published in the general monthly periodical are indexed as follows:

1. General articles, etc.
2. Authors including writers of "letters to the editor."
3. News items pertaining to Institute activities.
4. News items of a general nature.
5. Biographical (personal and obituary) items.

Page Allocation by Issues

January	1–56	July	283–324
February	57–96	August	325–364
March	97–146	September	365–404
April	147–190	October	405–446
May	191–232	November	447–494
June	233–282	December	495–542

During this year ELECTRICAL ENGINEERING has continued to carry the increased proportion of "general interest" articles provided for in the publication policy adopted in 1937 in response to the expressed desires of the membership. In a segregated TRANSACTIONS section of each monthly issue, a total of approximately two-thirds of the technical papers and associated discussions to be found in the 1939 annual bound volume of TRANSACTIONS, has been preprinted.

TRANSACTIONS

(Pages 11–18)

All technical papers and related discussions included in the annual TRANSACTIONS for 1939, volume 58, are indexed as follows:

1. Technical subjects.
2. Authors, including the writers of discussions. Discussions are published with the papers to which they apply.

Of the total content of the 1939 annual bound volume of AIEE TRANSACTIONS, pages 1–674 inclusive were preprinted in the TRANSACTIONS sections of the monthly issues of ELECTRICAL ENGINEERING during 1939 as tabulated below. Pages 675–914 inclusive were preprinted in the special "supplement" issued in December in limited quantity for the benefit of readers of ELECTRICAL ENGINEERING who are not subscribers to the annual volume.

Page Allocation by Issues

January	1–34	July	307–370
February	35–82	August	371–434
March	83–130	September	435–498
April	131–178	October	499–562
May	179–242	November	563–610
June	243–306	December	611–674

(Additional text pages in annual bound volume, 675–914; reports of the board of directors for 1938 and 1939, 915–38; indexes, 939–46.)

ELECTRICAL ENGINEERING

Subject Index

Accomplishments of Medalist Savage. Downing 347–8
Aids in the Search for Oil, Electricity. Silverman 455–62
AIEE and ASA, Standards Activities in. Farrer 164
AIEE Model Registration Law, Principles Underlying the 374–9
AIEE, Responsibilities of the. Parker 330–2
Airplanes, Optimum Voltage for. Grant, Peters 428–31
A-C Network—Operating Results, Philadelphia. Crosby 517–21
Application of Hyperbolic Functions, A D-C. (Letter) Beaver 358
Application of Light, Progress in the Production and. Powell 497–508
Armchair Spectator Conveyer-Guide, An. Dunlop, White 509–1
ASA, Standards Activities in AIEE and. Farrer 164
(Aviation) Optimum Voltage for Airplanes. Grant, Peters 428–31

B

Balancing of Incentive and Security, The. Flanders 67–71
Barrel Devised for Surge Tests on Oils, Test. (Filler) 15
Battery Charger, Magnesium-Copper Sulphide Rectifier. (Letters)
Bartholomew 396
Harty 536
Board of Directors, Report of the 305–17
Boulder Dam, Edison Line From. Michener 463–5
Bridge for Separating the Components of Traveling Waves, A. Hartig, Brunetti 345–6
Broadcasting in California, Facsimile. (Filler) 201
Bus Protection. (Letter) Hampe 396

C

Calculation of Resistance Steps in Starting Rheostats. (Letter) Ragazzini 318
(Calculation) Terminal Voltage Versus Field Current. Wright 299–300
Capital, Utility Engineering and. Kellogg 3–6
Letter 224
Careers of Faraday and Coolidge. Dunn 258–60
Coils in Skewed Slots, Skew Factor for. (Letter) Jaffe 133
Color, Light, and Structure at Golden Gate Exposition. Dickerson 234–50
(Communication) How Many Decibels? Lawther 328–9
Components of Traveling Waves, A Bridge for Separating the. Hartig, Brunetti 345–6
Compressor, Refrigerant-Cooled Motor Drives 100-Ton. (Filler) 468
Computation of Voltage Regulation With Four-Winding Transformers, Simplified. Evans 420–1
Conditions in Ferroresonance, Critical. (Letter) Odessey 49
Conservator, The Engineer as. Kellogg 291–3
Control, Self-Checking System of Supervisory. (Letters)
De Croce 50
Stewart 49
Conveyer-Guide, An Armchair Spectator. Dunlop, White 509–14
Coolidge, Careers of Faraday and. Dunn 258–60
Coolidge Receives 1938 IEE Faraday Medal 258–62
Copper Sulphide Rectifier Battery Charger, Magnesium. (Letters)
Bartholomew 396
Harty 536
Critical Conditions in Ferroresonance. (Letter) Odessey 49
Current, Terminal Voltage Versus Field. Wright 299–300

D

Decibels, How Many. Lawther 328–9
Demonstrator of Traveling Waves, Mechanical. Wagner 414–20
Designer Must Be a Good Prophet, A Good. Savage 348–9
Determining the Efficiencies of Small Motors, A Method for. Löf 339–40
Development, Technical Progress and Social. Compton 12–15
Letter 182
Developments in Electrical Units, Recent. Kennelly 78–80
Device for Viewing The Solar Corona. (Filler) 516
(Devices) Utilizing Heat From the Sun. Abbot 294–8
D-C Application of Hyperbolic Functions, A. (Letter) Beaver 358
Discussers, Some Types of. (Letter) Karapetoff 318

E

(Economics) Engineer as Conservator, The. Kellogg 291–3
Edison Line From Boulder Dam. Michener 463–5
(Edison Medal) Some High Lights in the Evolution of Electrical-Engineering Education. Jackson 165–8
Edison Medalist, Dugald Caleb Jackson—1938. Barker 64–6
Education, An Industrial View of Engineering. Eshbach 19–22
Education, Engineering. (Letter) Taylor 274
(Education) Graduate Training for Engineers. Morrow 118–22
Comments: Smith, Stevenson, Stein, Eshbach, Doherty, Sorensen, Fuller, Compton 168–74
Letter 441
(Education) Paradox of Social Progress, The. (Letters)
Douglas 49
Gross 89
Homan 48
Jansky 47
Lobo 90
MacMillan 182
Prince 46
Sorensen 90
Education, Professional Phase of Engineering. Daggett 16–18
(Education) Social Responsibility of the Engineer. Doherty 367–71
Education, Some High Lights in the Evolution of Electrical-Engineering. Jackson 165–8
(Education) Suggestions on Seeking Employment. Dalziel 202–05
(Education) Technical Progress and Social Development. Compton 12–15
(Education) What Is Engineering Experience? Scott 152–3
(Education) Young Engineer Facing Tomorrow, The. Wickenden 199–201
Effects of Technology on Our Social Thinking. King 423–6
Efficiencies of Small Motors, A Method for Determining the. Löf 339–40
Electric Railroads, Signaling on. Gillespie 333–8
Electric Strength of Fibrous Glass, The. Gemant, Glassow 341–5
Electrical Engineer, Elihu Thomson: Jackson 251–5
Electrical-Engineering Education, Some High Lights in the Evolution of. Jackson 165–8
Electrical Engineering, For Notable Scientific and Industrial Achievement in. (1938 IEE Faraday Medal Presented to W. D. Coolidge) 258–62
"Electrical Engineering," The Student Engineer and. (Letters)
Cobbs 273
Sorensen 181
(Electrical Machinery) Terminal Voltage Versus Field Current. Wright 299–300
Electrical Networks, Tensors and. (Letter) Ingram 274
Electrical Porcelain, Manufacture of. Whitney 7–11
Electrical Units, Recent Developments in. Kennelly 78–80
Electricity Aids in the Search for Oil. Silverman 455–62
Electricity as an Industrial Fire Hazard. (Filler) 427
Electricity for Treasure Island. Bear, Van Bokkelen, Snowden 149–151
Letter 273
Electrochemical, Electrometallurgical, and Allied Industries, Power Requirements in 208–16
Employment, Suggestions on Seeking. Dalziel 202–05
Engineer and "Electrical Engineering," The Student. (Letters)
Cobbs 273
Sorensen 181
Engineer as Conservator, The. Kellogg 291–3
Engineer Facing Tomorrow, The Young. Wickenden 199–201
Engineer, Social Responsibility of the. Doherty 367–71
Engineering and Capital, Utility. Kellogg 3–6
Letter 224
Engineering Education. (Letter) Taylor 274
Engineering Education, An Industrial View of. Eshbach 19–22
Engineering Education, Professional Phase of. Daggett 16–18
Engineering Experience, What Is. Scott 152–3
(Engineering) Human Relationships. Bennion 371–3
Engineering Opportunities in Manufacturing. Johnson 72–7
Engineering Schools and Engineering Industries. (Filler) 201
Engineering, Social Significance of The. Jackson 59–63
Engineers, Graduate Training for. Morrow . . . 118–22
Comments: Smith, Stevenson, Stein, Eshbach, Doherty, Sorensen, Fuller, Compton 168–74
Letter 441
Engineers, Model Law for the Registration of, A. Beardsley 375–9
Engineer's Social and Political Relations, The. Parker 113–14
Engineers, Some Thoughts on the Social Obligation of. Parker 285–6
Engineers Today, Why So Few Famous 422
Letters 487, 488, 535
Enterprise and Social Progress. Jordan 193–8
Equations in a Many-Dimensional Representative Space, Kirchoff's. (Letters) Karapetoff 225, 395
European Welding Practice. (Filler) 262
Evolution of Electrical-Engineering Education, Some High Lights in the. Jackson 165–8
Exciting and Pleasant 40 Years, An. Jewett 160–2
Experience, What Is Engineering. Scott 152–3
Experiences From the New England Hurricane. Wesselius, Withington, Doebler, Brown, Haines, Harrison 99–112
Exposition, Color, Light, and Structure at Golden Gate. Dickerson 234–50
(Exposition) Electricity for Treasure Island. Bear, Van Bokkelen, Snowden 149–51
Letter 273

F

Facsimile Broadcasting in California. (Filler) 201
Fair, Fountains of the Lagoon of Nations at the New York World's. (Photo) 198
(Fair, New York World's) An Armchair Spectator Conveyer-Guide. Dunlop, White 509–14
Fair Will Open April 30, New York World's. (Photos) 163
Faraday and Coolidge, Careers of 258–60
Faraday Medal, 1938, Presented to W. D. Coolidge 258–62
Faraday's Work, Modern Developments From. Coolidge 260–2
Federal Government and Research, The. Potter 205–07
Few Famous Engineers Today, Why So 422
Letters 487, 488, 535
Ferroresonance, Critical Conditions in. (Letter) Odessey 49
Fibrous Glass, The Electric Strength of. Gemant, Glassow 341–5
Field and Laboratory, Lightning Strokes in. Belaschi 466–8
Field Current, Terminal Voltage Versus. Wright 299–300
Fire Hazard, Electricity as an Industrial. (Filler) 427
(Fritz Medal) An Exciting and Pleasant 40 Years. Jewett 160–2
Fritz Medalist, Frank Baldwin Jewett—John Compton 115–17
Functions, A D-C Application of Hyperbolic. (Letter) Beaver 358

G

Gearmotors, Recent Developments in. (Filler) 154–5
Generator, Lamp-Size Steam. (Filler) 262
Generators, Vertical-Shaft. Sills 469–79
Glass, The Electric Strength of Fibrous. Gemant, Glassow 341–5
(Golden Gate) Electricity for Treasure Island. Bear, Van Bokkelen, Snowden 149–51
Letter 273
Golden Gate Exposition, Color, Light, and Structure at. Dickerson 234–50
Government and Research, The Federal. Potter 205–07

Graduate Training for Engineers. Morrow..118–22
Comments: Smith, Stevenson, Stein, Eshbach, Doherty, Sorensen, Fuller, Compton...168–74
Letter...441
Guide, An Armchair Spectator Conveyer. Dunlop, White...509–14

Comments: Smith, Stevenson, Stein, Eshbach, Doherty, Sorensen, Fuller, Compton....168–74
Letter....441
Transactions Supplement for 1939 to Be Issued Soon....432–5
Transformers, Simplified Computation of Voltage Regulation With Four-Winding. Evans. 420–1
(Transmission) A Bridge for Separating the Components of Traveling Waves. Hartig, Brunetti....345–6
(Transportation) Signaling on Electric Railroads. Gillespie....333–8
(Transportation) Union Pacific's New Steam-Electric Locomotive....407–13
Traveling Waves, A Bridge for Separating the Components of. Hartig, Brunetti....345–6
Traveling Waves, Mechanical Demonstrator of. Wagner....414–20
Treasure Island, Electricity for. Bear, Van Bokkelen, Snowden....149–51
Letter....273
Treasure Island, San Francisco. (Cartograph and Color Photos)....234–50

U

Union Pacific Railroad, Steam-Electric Locomotive Completed for. (Filler)....22
Union Pacific's New Steam-Electric Locomotive....407–13
(Units) How Many Decibels? Lawther....328–9
Units, Recent Developments in Electrical. Kennelly....78–80
Utilizing Heat From the Sun. Abbot....294–8
Utility Engineering and Capital. Kellogg....3–6
Letter....224

V

Vertical-Shaft Generators. Sills....469–79
Voltage for Airplanes, Optimum. Grant, Peters....428–31
Voltage Regulation With Four-Winding Transformers, Simplified Computation of. Evans....420–1
Voltage Versus Field Current, Terminal. Wright....299–300
Voltages for Lighting, Service. (Filler)....421

W

Waves, A Bridge for Separating the Components of Traveling. Hartig, Brunetti....345–6
Waves, Mechanical Demonstrator of Traveling. Wagner....414–20
Welding Practice, European. (Filler)....262
West, Color: New Synthesis in the. (Golden Gate Exposition). Dickerson....234–50
(Westinghouse) Manufacture of Electrical Porcelain. Whitney....7–11
What is Engineering Experience? Scott....152–3
Why So Few Famous Engineers Today?....422
Letters....487, 488, 535
Wire Insulation, Synthetic Materials as. Patnode, Flynn, Weh....379–88
World Telephone Statistics. (Filler)....426
Wye-Delta Transformation, Sequence Components and the. (Letter) Curry....535

Y

Young Engineer Facing Tomorrow, The. Wickenden....199–201

Author Index

Abbot, C. G. Utilizing Heat From the Sun. 294–8

TRANSACTIONS

(See page 2 for explanation)

Technical-Subject Index

Air at High Pressure, The Electric Strength of. Skilling....161–5; disc. 165

Air Breaker, A New High-Capacity. Ludwig, Grissinger....414–18; disc. 418

Air Circuit Breaker for Central-Station Service, High-Power "De-ion." Dickinson....421–5; disc. 425

Air Conditioning, The Rating and Application of Motors for Refrigeration and. Rutherford....519–23; disc. 523

A-C Arc Progresses, The. Holslag....364–7; disc. 367

A-C Circuits of Grid-Controlled Rectifiers and Inverters, Harmonics in the. Evans, Muller....861–8; disc. 869

A-C Fields, Use of Bismuth-Bridge Magnetic Fluxmeter for. Smith....52–5

A-C Potentiometer and Its Application to the Non-Destructive Testing of Insulating Equipment, An Automatic. Keinath....887–90; disc. 890

Alumina, Reconditioning of Insulating Oils by Activated. Housley....172–6; disc. 176

Aluminum-Nickel-Cobalt Brake Magnets for Watt-Hour Meters. Green....791–6; disc. 796

ASA Transformer Standards, A Discussion of Proposed. Henry....289

Amplifier-Wattmeter Combination for the Accurate Measurement of Watts and Vars, An. Brown, Cahoon....593–7; disc. 597

Amplitude Characteristics of Telephonic Signals, Devices for Controlling. Norwine....62–7

Analysis, Regulating Transformers in Power-System. Hobson, Lewis....874–83; disc. 883

Apparatus, The Rating of Electrical Machinery and Hellmund....499–503; disc. 503

Application of Capacitance Potential Devices. Clem....1–8; disc. 8

Application of Deceleration Test Methods to the Determination of an Induction-Motor Performance, An. Ager....72–6

Application of Lightning Arresters, Testing and. Committee Report....68–71

Application of Motors for Refrigeration and Air Conditioning, The Rating and. Rutherford....519–23; disc. 523

Application of Petersen Coils, The Electrostatic Unbalance of Transmission Lines and Its Effect on the. Lyon....107–12; disc. 112

Applications of Copper-Oxide Rectifiers. Morris....103–06

Applications of the Type J Carrier System, Some. Starbird, Mathis....666–72; disc. 672

Aqueduct, The Pumping System of the Colorado River. Gaylord....112–23; disc. 123

Arc Extinction on a Petersen-Coil System, Factors Affecting. Baton....576–81; disc. 581

Arc Progresses, The A-C. Holslag. 364–7; disc. 367

Arc Rectifiers, Voltage Control of Mercury. McDonald....563–6; disc. 566

Arrangement of Electrical Equipment in Hydraulic Power Plants, Trends in the Design and. Welchel....78–82; disc. 82

Arresters, Testing and Application of Lightning. Committee Report....68–71

Asbestos and Glass-Fiber Magnet-Wire Insulation. Mathes, Stewart....290–4

Automatic A-C Potentiometer and Its Application to the Non-Destructive Testing of Insulating Equipment. Keinath....887–90; disc. 890

Automatic Boosters for Economical Correction of Voltage on Distribution Circuits, Capacitors and. Olmsted....491–6; disc. 496

Automatic Voltage Regulator Without Moving Parts Employing Ferroresonance, An. Craig....830–6; disc. 836

Automobile Tire Fabrics, Continuous Processing for. Cassidy, Mosteller....218–23

B

Band Transmission System for Animated Line Images, Narrow. Skellett....124–7

(Basic Sciences) Current Distribution in a Rectangular Conductor. Daley....687–90; disc. 690

(Basic Sciences) Generalized Solution for the Critical Conditions of the Ferroresonant Parallel Circuit, The. Thomson....743–6; disc. 746

(Basic Sciences) Similitude of Critical Conditions in Ferroresonant Circuits. Thomson....127–30; disc. 130

(Basic Sciences) Subharmonics in Circuits Containing Iron-Cored Inductors—II. Travis. 735–42

(Basic Sciences) Two-Phase Co-ordinates of a Three-Phase Circuit. Kimbark....894–904; disc. 904

(Basic Sciences) Values of the Bessel Functions ber x and bei x and Their Derivatives. Dwight....787–90

Battery Charger for Railroad Passenger Cars, The Magnesium-Copper Sulphide Rectifier. Kotterman....260–5

Bessel Functions ber x and bei x and Their Derivatives, Values of the. Dwight....787–90

Blocking and Selective Tripping With Impedance Relays, Out-of-Step. Vaughan, Sawyer....637–45; disc. 645

Board of Directors, Report of the 1938....915–25 1939....926–38

Board, Remote-Control Toll. Sorber, Smith....696–704; disc. 704

Boosters for Economical Correction of Voltage on Distribution Circuits, Capacitors and Automatic. Olmsted....491–6; disc. 496

Boston Edison Company, Modernization of L Street Station Switch House. Corney, Edson....770–8; disc. 778

Boulder Dam Transmission Line, Symposium on Operation of the:
Carrier-Current Equipment. Laughlin....147–51; disc. 156
Corona Experience on Transmission Line. Cozzens, Peterson....137–40; disc. 156
Insulation and Lightning Protection. Cozzens....140–6; disc. 156 and 913
General Operation of Transmission Line. Peterson....131–7; disc. 156 and 913
Transmission Line Relay Protection. Draper....151–6; disc. 156

Brake Magnets for Watt-Hour Meters, Aluminum-Nickel-Cobalt. Green....791–6; disc. 796

Breakdown Studies in Compressed Gases. Howell....193–204; disc. 204

Breaker, A New High-Capacity Air. Ludwig, Grissinger....414–18; disc. 418

Breaker for Central-Station Service, High-Power "De-ion" Air Circuit. Dickinson....421–5; disc. 425
